Nicolas **Comte**, Ph.D

Profile

R&D Engineer & Computer Science Ph.D. specializing in AI, computer vision, molecular biology and medical imaging.

Combining expertise in research, engineering, and Agile methodologies, I design and conduct deep learning, modeling, and simulation projects.

Personal information

Citizenship French
Family Married, 2 children
Languages French, english

Skills

AI & Computer Sci. Deep learning, 3D mesh processing, 2D/3D Medical Imaging analysis, Mocap
Software Eng. C++, Python, Git, CI/CD, Agile methodology
Tools & Methodology Pytorch, Scikit-learn, R, Matlab, Sofa
Communication LaTeX, HTML, Gimp, Krita, Inkscape

Professional Experience

R&D Engineer at *Circle (France).* **2025–pres**
◇ Deep Learning & MLOps: Design, train, and deploy models for automated analysis of 3D intraoral scans, following MLOps.
◇ Software Optimization: Optimize 3D data pipelines for commercial software integration.
◇ Agile Dev: Agile Facilitator and developer.

R&D Engineer at *Anatoscope-Circle (France).* **2024–2025**
◇ Development of commercial applications for creation and automated 3D analysis of human digital twins. End-to-end 3D medical data pipelines.
◇ Agile Facilitator, Dev

R&D Engineer & PhD Candidate at *Inria*, *Anatoscope (France).* **2019–2023**
◇ Industrial R&D: Conducted joint research on medical image processing, 3D anatomical modeling, and simulation of scoliotic spines.
◇ Algorithm Design: Developed novel machine learning methods integrating motion capture data into 3D structural spine models.
◇ Impact & Awards: Published research and won Best Poster Award in AI for Biomedical Imaging (IABM 2023).

Software Engineer at *Inria (France).* **2016–2018**
◇ Engineering of fast, open-source C++/Python scientific applications for molecular phylogeny.
See Treerecs and Seaview 5.
+ teaching at *INSA Lyon* C++ programming.

Education

Ph.D in Computer Science. *Université Grenoble-Alpes.* **2020-2023**
◇ Thesis title: *Learning scoliosis patterns using anatomical models and motion capture.*

Engineer in Bio-Informatics and Modeling. *INSA Lyon.* **2013–2016**

Bachelor in Bio-Informatics. *Université de Lyon.* **2010–2013**

Awards

Best Poster in artificial intelligence applied in biomedical imaging. *IABM 2023, Colloque National en Intelligence Artificielle en Imagerie Biomédicale.*

Gold medal and Best Composite Part. *IGEM 2014, International Genetically Engineered Machine competition.*

Hobbies

Graphics: infographics, illustration, digital drawing and painting.

Science communication: member of *Démesures 2017-2019* (France), animator, speaker in *Geek Touch 2018*, *Fête de la Science 2017, 2018*, ...

Photography: hyper/macrophotography @cometicon.macros

Programming: various side projects in simulation and artificial life....
